

GP Chronic Condition Management Plan (GPCCMP)

A **GPCCMP** is a structured plan developed by your GP to coordinate the care of patients with chronic conditions. The plan helps improve health outcomes and includes setting goals, identifying needs, and arranging referrals for up to **five Medicare-rebated** allied health services per year.

What a GPCCMP is

- A written plan prepared by our practice nurse and finalised by your GP to manage a chronic condition that is likely to be present for at least six months.
- It outlines your health and lifestyle goals, patient actions, and necessary treatments or referrals.
- The plan helps ensure continuity of care by coordinating with various healthcare professionals.

How to get a GPCCMP

- Discuss with your GP whether you have a chronic condition and would benefit from a structured plan.
- If you are registered with **MyMedicare**, you must access the plan through your enrolled practice (if not Honeycomb Health).
- Make a 30-minute appointment with our nurse and a 15-minute appointment with your doctor (**bulkbilled!**).

What you can get from a GPCCMP

- Referrals for up to **five** Medicare-rebated allied health services in a calendar year.
- You can choose to use all five sessions with one type of allied health professional or split them among different disciplines, such as a physiotherapist and an exercise physiologist.
- A list of eligible allied health practitioners includes Aboriginal Health Worker, Audiologist, Chiropractor, Diabetes Educator, Dietitian, Exercise Physiologist, Mental Health Worker, Occupational Therapist, Osteopath, Physiotherapist, Podiatrist, Psychologist, and Speech Pathologist.
